Professional Summary

I am a dedicated and hard working individual who tends to thrive in a fast paced environment. I know I will get my job done the right way and get it done in a timely manner.

Currently, I am enrolled at VCU studying psychology (first year.) Although I have been out of school for about 10 years, I have always had a passion for psychology and psychiatry, and my ultimate goal is to get my doctorate in psychology and open my own practice that includes many different mental health services that are more easily accessible for people who are financially strapped, have insurance issues, etc. At this moment, I am not set on what type of therapy field I would like to study/have a career in, but I am considering moving forward with studying couples counseling.

I am forward-thinking, and will do what it takes to reach my goals, whether that is a job, career, my degree, etc.
