## Work Experience

### Career pause

April 2021 - April 2022

Power in the Pause; Life evolves. This section denotes an extended step away from the paid workforce to significantly contribute to one's family. Had a stroke April 20, 2021. I am still recovering. I founded Pacific Real Estate Solutions LLC in 2019 but have been working building the practice. I am learning machine learning and AI and continue to learn the new programming practices. I have a news website <https://newsonthebluemarble.com> which keeps me current on everything. I am aligned with Pace Morby's creative real estate. I also plan to get re-admitted to the California State Bar. I hit 70 but can't or rather won't retire because there is so much work to be done to make this place a better place. I also care for my 23 year old son who has been struggling.

### Front End Developer

Feb 2020 - Mar 2020

Apple

Cupertino, CA
